## Bring Your Subwoofer to Life

Once you hear the difference, you'll never go back. The SubTrap is more than a simple isolation stand. In addition to isolation, it absorbs excess bass and diffuses treble. The end result is a unique product available only from ASC. Raise your subwoofer up to its full performance potential. Now you can finally fill your room with awesome bass power. Just slip the ASC-SubTrap underneath your subwoofer and you'll create the powerful "SubStack." Instantly improve sonic detail, changing "fuzzy" playback into a richly detailed picture. Works with virtually any sub-woofer, the ASC-SubTrap lets your subwoofer finally play and be heard to its fullest potential.

## Crank up the Volume

The ASC-SubTrap brings out the full potential of your subwoofer. Due to resonant modes, inherent in all small listening spaces, sonic detail can get cancelled. The result is what we call "Room-Boom," a muddled blur of sound. This happens even though the subwoofer is producing great

bass and plenty of detail. Sadly, the rich sound never reaches your ear, instead you get "Room-Boom". By raising the sub off the floor and putting a SubTrap under it, the subwoofer is effectively decoupled from the vertical room mode. Excess bass buildup is reduced and the playback volume of the subwoofer can be turned back up. The SubTrap is the latest member of the TubeTrap™ product line by Acoustic Sciences Corporation.

We have been providing acoustic upgrades for high performance audio since 1984. The SubTrap is available through quality audio dealers nationwide.

## The Bottom Line

The ASC-SubTrap offers a real improvement to the sound of any sub-woofer. Available in two sizes, 18" and 22". Easy setup, just place the SubTrap under the subwoofer, and that's all there is to it.

# SubTrap™

## SPECIFICATIONS

Deeper bass extension means a more explosive impact and uniform bass response.

Small footprint Supports 250 pounds!

In his own words, writer **Kalman Rubinson** says the SubTrap is something most subwoofer owners will "have to have."
